Wedding Photos Check List

1. Every single formal picture will take around 3 to 5 minutes. Base on "Wedding Photo Check List" we will prepare optimal sequence of photo shoot with small kids and seniors first, big groups to small etc. for optimal time usage.

2. With formal photos some couples want to minimize the time between the ceremony and reception so they don't keep the guests waiting too long. If you're in this category, there are two options.

- One choice is to take all the formal portraits prior to the ceremony.
- The second choice is to only take the formal portraits that don't involve both the bride and groom together prior to the ceremony. These pictures might be of the bride and her bridesmaids, the bride and her parents, the groom and the groomsmen, etc.

3. During the formal portraits, you will need your mistress of ceremony, wedding coordinator or family member to assist the photographer, by gathering all people needed for the formal pictures and making sure all essential family groupings have been photographed. This will help to keep formal pictures photo shoot on schedule.

4. Please, inform us if, there are any sensitive situations in your respective families, such as divorced parents, stepparents that might not want to be photographed together, etc.
